## SUMMARY

Data Analyst skilled in SQL, Python, and Excel, with hands-on experience cleaning, analyzing, and visualizing data to uncover actionable business insights. Proficient in building interactive dashboards using Tableau, Matplotlib, and Seaborn, and comfortable working with Pandas and NumPy for end-to-end data preparation. Recently delivered measurable results in a real-world data cleaning and analysis simulation, resolving data quality issues and answering executive-level business questions. Looking to apply strong analytical thinking and attention to detail to help teams make faster, data-driven decisions.

## EDUCATION

### Master of Computer Application

07/2024 – 06/2026

Chandigarh University

Grade : 8.85 CGPA

### Bachelor of Computer Application

07/2019 – 06/2023

Indira Gandhi National Open University

Grade : 66.57%

## SKILLS

Excel | SQL | Tableau | Python | Numpy | Pandas | Seaborn | Matplotlib | Git & Github |  
PowerBI | Streamlit | Flask

## CERTIFICATES

### Data Analyst Job Simulation — OneRoadmap (Excel) 🔗

Data Analyst | July 2026

- Cleaned and standardized a 5000+ row retail sales dataset (UrbanKart) in Excel, resolving 150 duplicate records, 120 city name spelling variants, and 60 missing region values with 100% accuracy against evaluator benchmarks.
- Diagnosed and documented 6 distinct data quality issues (inconsistent date formats, currency prefixes, negative/zero quantities, missing values, city naming variants) and applied rule-based logic to remove invalid records while preserving data integrity.
- Delivered data-driven answers to 3 executive-level business questions on regional revenue contribution, month-on-month growth momentum, and sales channel performance, achieving 100% accuracy on all 7 quantitative metrics (region revenue, MoM revenue trend, channel share).
- Authored an executive memo recommending against discontinuing the lowest-revenue sales channel (Marketplace, 29.4% share), correctly identifying that revenue share alone was a misleading metric and highlighting growth trend as the decisive factor.

## PROJECTS

### Sales and Customer Dashboards (Tableau) 🔗

02/2025 – 02/2025

Data Analysis, Data Cleaning

- Designed and developed two interactive dashboards to analyze sales performance and customer trends, providing actionable insights for sales managers and executives
- Sales Dashboard: Analyzed sales, profit, quantity, weekly trends, and product performance across two years with key KPIs and year-over-year comparisons.
- Customer Dashboard: Visualized customer behaviour, segmentation, distribution, and top 10 customers by profit.

### Sales Dashboard (PowerBI) 🔗

08/2026 – 08/2026

- Analyzed \$2.26M in retail sales across 5K+ orders and 793 customers, identifying key revenue drivers, customer segments, and geographic trends using Power BI.
- Built interactive Power BI dashboards with DAX KPIs, dynamic filters, and segmentation, highlighting Consumer as the top segment (50.8%) and Technology as the leading category.
- Evaluated fulfillment efficiency and shipping performance, including ~5-day average delivery time and order distribution across shipping modes.
